Win-win Pandemic Prevention Protect Yourself and Others

The number of new *infections* has rebounded and the COVID-19 pandemic is spreading again. Several shopping malls and public recreational centres in the Klang Valley have reported *confirmed cases*. This alarming trend should not be taken lightly. To ensure the health and safety for all students, teachers and staff, below are preventive measures to be taken as prescribed by the Education Department and Health Department.

Scenario	Course of action
Student confirmed infected	<ol style="list-style-type: none">1. Notify class teacher immediately.2. Follow Health Department's instructions to seek medical treatment and isolation at a designated hospital.
Parent confirmed infected (student has close contact with the infected parent)	<ol style="list-style-type: none">1. Notify class teacher immediately.2. The student shall follow Health Department's instructions to seek COVID-19 screening test at a designated hospital. If tested positive, the student is required to be isolated.3. Notify class teacher immediately and wait for the school's notification to resume attending classes at school.
Student visited an infected zone	<ol style="list-style-type: none">1. Notify class teacher upon receiving the notification from the Health Department to be tested for COVID-19 at a designated hospital.2. Be home quarantined while waiting for test result and school's notification to resume attending classes.3. If tested positive, notify the school immediately and follow Health Department's instructions to seek treatment and be isolated at a designated hospital.

<p>Student has close contact with a friend/relative visited an infected zone</p>	<ol style="list-style-type: none">1. If a relative or friend has been notified by the Health Department to be tested at a hospital, the student should immediately inform the class teacher. Otherwise, there is no need for the student to be quarantined.2. If a friend or relative is confirmed infected, the relative/friend shall follow Health Department's instructions to seek treatment and be isolated at a designated hospital. The infected friend or relative shall strictly adhere to isolation SOPs and avoid contact with the student.3. If a friend or relative is confirmed infected, the student shall be quarantined, get tested at a hospital and report the test result to the class teacher.4. If the student is tested positive, the student shall follow the Health Department's instructions to seek treatment and be isolated at a designated hospital.
<p>A parent / relative / friend of a student is visiting / will visit / have visited a red zone</p>	<ol style="list-style-type: none">1. The student shall notify the class teacher.2. The parent/relative/friend shall get tested, be home quarantined and must NOT come into close contact with the student by strictly adhering to SOPs.3. The test result of the parent/relative/friend shall be reported to the class teacher on a timely manner.

Let's do our part diligently and carry out our new responsibilities under the new normal. The fight against the pandemic begins with every one of us.

Thank you.
